

Advanced Lightwire Functional (ALF)

A NEW DAWN IN ORTHODONTICS

2 DAY SEMINAR BY DR J.W. 'SKIP' TRUITT BS, DDS

This course will detail Dr. Darick Nordstrom's specially designed and developed appliances that are used in conjunction with the ALF philosophy. The basic concept is to create appliances that do not lock up the maxilla in a block of acrylic. Therefore the appliances are very small and easy for the patient to wear. This permits the cranial sutures to assume their natural posture. The appliances, used in conjunction with cranial manipulations, will allow for a more permanent dental result and aid in the elimination of multiple dysfunctions.

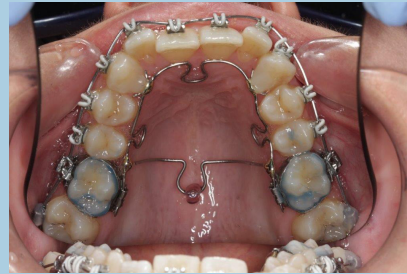

Benefits of the ALF appliance range include:

- Versatility, a method to align teeth without braces or turbo charge orthodontic treatment in conjunction with any bracketing system, see images with Delta Force System.
- Orthopaedic pre-treatment for SmileTRU.
- It addresses alignment of the bones (orthopaedic treatment) using principles of cranial osteopathy delivering fast & effective skeletal arch development.
- It brings about changes in muscle function to achieve stable results.
- Cosmetics - barely visible and excellent patient tolerance.
- Focused on facial development.
- Preserving and improving the airway.
- Enhancing TMJ Health.
- Easy to adjust.

YOU will learn:

- The embryology & principles of skeletal arch development
- The various options for Light Wire Appliances
- Hands on adjustment of all Light Wire Appliances
- The use of ALF appliances with the Delta Force bracket system.

This is an excellent opportunity to educate yourself and your staff on how to incorporate state of the art orthodontics into your dental practice.

ALF with Delta Force Brackets, TPA and tongue training ball for active tongue thrust therapy.

Development achieved 6 months active treatment. TPA removed and tongue thrust under control.

Friday 13th & Saturday 14th July 2018

Sheraton Hotel, 27 Little Collins St, Melbourne

16 CPD Hours | 9am - 5pm

Registration from 8.30am DAY 1

EARLY BIRD SPECIAL - \$1895.00 +GST*

Registration by 29th June 2018

Registration after 29th June 2018

\$2295.00 +GST*

*Includes ALF Appliance & 3D Printed Model
