

Ortho and YOU!

**Smile Corporation offers
2 seminars presented
by the world's most
foremost Ortho lecturer
Dr. J.W. 'Skip' Truitt**

Seminar 1- Part A: Complete Maxillofacial Orthopaedics (CPD 16hrs) - 2 DAYS Friday & Saturday

This seminar has attracted over 50,000 dentists worldwide and is the most comprehensive post graduate course available. Face the facts...more ortho cases are now being treated on a non-extraction basis at an earlier age by general dental practitioners. If you wish to develop the orthodontic side of your practice, this is the course for you! A series of removable orthopaedic and functional appliances, designed to correct structural deformities prior to straightening teeth. It's easier than you think!

Dr Truitt's step-by-step tuition, backed by over 2,000 slides documenting numerous cases, will give you all the tools you need to begin treating cases immediately. You will learn the benefits of early interceptive treatment, how to correctly diagnose and then treat developing malocclusions that you see every day in your practice. Learn how to translate the mandible to skeletal class I; from class II and class III using functional orthopaedic appliances ie: Twin Block, Bionator. This is the final piece of the puzzle in treating the growing patient.
