Smile Corporation presents Dr J.W. 'Skip' Truitt, world renowned clinician and lecturer in Orthopaedics, Orthodontics, TMD and airway obstruction.

If you wish to develop the orthodontic side of your practice, this introductory course is for you!

Dr. J.W. 'Skip' Truitt will show you how to recognise and treat patients from as young as four years of age onwards. You will learn the benefits of early interceptive treatment, how to correctly diagnose and treat developing malocclusions that you see every day in your practice. This will include airway obstruction, Eustachian tube dysfunction, improper jaw growth, dental and skeletal malocclusions, and give you the ability to identify a range of TMJ imbalances and associated TMD. He will cover topics from the entire 6-Course program from the Clinical Foundation of Orthopaedics, Orthodontics & TMD, giving you an insight into Skip's philosophy of treatment.

Dr Truitt will also introduce you to the Advanced Lightwire Functional (ALF) appliance combined with the Delta Force Bracket system that can reduce orthodontic treatment time by as much as 60%.

**ALF with Delta Force Brackets
on insertion**

**6 Months Post Insert
TPA removed**

In addition Dr. Truitt will outline how the Clinical Foundation can provide the Bimler cephalometric tracing analysis service with a Schwarz-Korkhaus cast analysis. This information is then interpreted by a specialist orthodontist providing the doctor with a suggested treatment plan including an appliance Rx where orthopaedic treatment is indicated.

At the conclusion of the seminar you will have an overview of the entire continuing education program offered by the Clinical Foundation of Orthopaedics, Orthodontics & TMD. This really is a must-see lecture if you have any interest in orthodontics or orthopaedics.

Don't miss this opportunity to hear this valuable information in Auckland!

DR J.W. 'SKIP' TRUITT DDS BS

Educator Dr. 'Skip' Truitt is the Director of Continuing Education for the Clinical Foundation of Orthopaedics, Orthodontics & TMD Therapy. Dr Truitt has 50 years experience in maxillofacial orthopaedics, orthodontics and TMD therapy and in doing so, has developed treatment protocol that is both unique and highly successful. He has co-authored four text books and published numerous papers in various countries. Doctors from around the world use his service and years of experience to elevate their practice to another level. Dr Truitt is an IAO Senior Certified Instructor who gives lectures and case consultations in the US, Canada, Ireland, Norway, UK, Continental Europe, Australia, South Africa, Mexico, Thailand and Malaysia.

"My goal is to teach the latest information in a concise easy-to-understand manner to expand your practice financially and professionally"
